Summary

College student majoring in information systems with a passion in web development. Looking for opportunities to learn, grow, and gain new skills. Have experience in Javascript, ExpressJS, and Laravel.

Projects I've done:
-Dailee, simple task management app made with ReactJS and MaterialUI. This application utilizes Firebase as the backend to store relevant data, as well as for authentication to personalize data for each user. https://ansellmaximilian.github.io/dailee/

-Attack on Titan API, a fun personal project. A complete CRUD API about the show Attack on Titan. This API was created using Laravel and secured with Sanctum. I also created a front-end application that consumes this API for performing CRUD operations on the data with an interface. https://attackontitanapi.herokuapp.com

-Developer Portfolio, a personal portfolio site created using HTML and Javascript with no frameworks. Sass was used and compiled for the styling of the website. This website was deployed to github using github-pages. https://ansellmaximilian.github.io/

Education

Matana University
Information Systems, Management Information Systems, General
2018 - 2022

Licenses & Certifications

CSS - HackerRank
defbf377908f

React (Basic) - HackerRank
